PROFILE SUMMARY

Motivated and disciplined Linux Administrator with 1 year of hands-on experience managing and supporting Linux systems in production environments. Strong foundation in Linux administration, system troubleshooting, user and permission management, package management, and basic networking. Proven problem-solving ability and cross-team coordination skills developed through professional experience. Actively strengthening skills in system automation, monitoring, and infrastructure best practices, with a strong commitment to continuous learning.

TECHNICAL SKILLS

Linux Administration

- File system management, permissions, ownership
- User & group management
- Package management: yum, rpm, apt
- Service management: systemctl
- Editors: vi, vim, nano
- Disk & storage: fdisk, LVM, mounting, partitioning
- Scheduling: cron
- Networking: SSH, IP, DNS, ports, routing basics
- Utilities: rsync, scp, grep, find, tar, wget, curl
- OS Experience: Ubuntu, CentOS

AWS Cloud

- EC2, S3, IAM roles & policies
- VPC, Subnets, Route Tables, Security Groups
- Application Load Balancer (ALB), NAT Gateway, Internet Gateway
- Monitoring & logging: CloudWatch
- Security assessment: Amazon Inspector
- Two-Tier Architecture deployment (public web tier + private DB tier)
- Linux server setup and configuration on AWS

DevOps Tools

- Git, GitHub
- CI/CD basics (GitHub Actions)
- Networking fundamentals

PROJECTS

Two-Tier Architecture on AWS (VPC, NAT Gateway, Load Balancer)

Designed and deployed a secure and scalable two-tier architecture on AWS using a custom VPC.

- Public subnet hosting web servers behind an Application Load Balancer
- Private subnet hosting a database server
- NAT Gateway for secure outbound access
- Configured route tables, IAM roles, and security groups
- Ensured isolation between application and database layers
- Demonstrated strong understanding of cloud networking and security

---

PROFESSIONAL EXPERIENCE

Linux Admin Support

Viva Studio | Feb 2025**–** Present

- Provided administrative support for Ubuntu and CentOS servers in production environments.
- Managed users, groups, permissions, and ownership, ensuring secure system access.
- Installed and maintained packages using yum, rpm, and apt.
- Monitored and managed services with systemctl and scheduled tasks using cron.
- Handled disk management including partitioning, LVM, and mounting file systems.
- Supported basic networking (SSH, IP, DNS, ports) and used tools like rsync, scp, tar, grep, find, wget, and curl.
- Edited system configurations using vi/vim and nano and assisted with troubleshooting and system maintenance.

Business Development Executive

Pixerview | Jan 2021 – Jan 2025

- Managed client requirements and coordinated with technical teams
- Ensured smooth execution of projects by aligning teams and resolving blockers
- Identified workflow gaps and suggested improvements
- Handled social media trends and content workflows

EDUCATION

B.Sc (Information Technology)

JM Patel College, Mumbai
Graduated: 2020

ADDITIONAL STRENGTHS

- Fast learner with strong curiosity for cloud & automation
- Excellent communication and teamwork
- Strong discipline from 4+ years of professional experience
- Ability to work under pressure and deliver on deadlines
- Problem-solving mindset and attention to detail
